# 1 Introduction

This report is basically a recap of my experience after jumping into the “Lạc trên biển” game. It’s fundamentally a survival challenge where we had to make quick and important decisions on which object to take among the limited resources in a tough spot.

The main goal of this report is pretty simple:

1. To compare the score I got with the score my team got.
2. To share the most crucial lessons about communication and decision making that I learned.
3. Discuss about the most valuable member in the team
4. Give some opininons what I would do if I had a chance to play again

By breaking down those key decisions and their consequences in the simulated environment, this document will really highlight the practical learning value that the “Lạc trên biển” experience offered me.

# 2 Comparison

My score is much lower than the score of my group (70 - 48). The reason there is a big difference is because of multiple viewpoints in decision making when encountering harsh situations.

My decision was to break out, survive, and finally find rescue. After listening to the teachers and discussing with my team, I have determined that my choices were most influenced by movies and video games. My survival knowledge is limited and needs improvement for rare scenarios.

Although my group had the same thinking as me, they still thought of taking the necessary tools to find rescue as fast as possible. Some tools I thought would be useless (such as the mirror and the fishing toolbox), turns out to be one of the most important ones to increase the chance of survival.

In conclusion, my decisions were off and I need to learn more to prepare in advance when having trips on the sea. I would like to thank my teachers and my team for clarifying my thinking.

<sup>2</sup> Giá trị tuyệt đối của hiệu xếp hàng của nhóm và đáp án, tức là xếp hàng của nhóm ở cột B trừ cho đáp án ở cột C

### 3 Lessons

Communication and Decision Making are two necessary skills to improve workflows and productivity. Many influencers emphasize the importance of these two skills. I care about improving myself, so practicing communication and decision making is a must-do job. Fortunately, the Faculty of Information Technology provides us with a Soft skills course which is a unique opportunity to improve ourselves.

The experience gained from the game "Lạc trên biển" has enhanced my confidence in expressing my opinions, exchanging information, and engaging in debate. Despite the rejection of some suggestions, I remain motivated to articulate my perspective and assimilate new viewpoints. I consider communication practice essential, as it establishes the necessary framework for collaborative team projects. Effective communication mitigates social awkwardness and strengthens interpersonal relationships, as evidenced by my discussions with teammates during the "Lạc trên biển" activity.

My attendance in the game also resulted in improved decision-making skills. The challenging scenario necessitated making appropriate and timely choices for survival, compelling me to engage in deep, logical, and rapid thought processes. This skill set is equally applicable to real-life situations, which, while perhaps not as harsh, still demand a logical thinking process to achieve optimal outcomes. Although my in-game decisions were flawed, they clearly illustrated my thought progression, allowing me to gain invaluable lessons.

## 4 My opinions about my team

The "Lạc trên biển" game proved to be an outstanding collective undertaking, one that genuinely underscored the synergy within our team. Frankly, the entire execution was remarkably seamless—it became evident that we shared an intuitive understanding and operated with a commendable rhythm. Every member demonstrated a high level of commitment, investing considerable effort, which ultimately proved instrumental in securing a favorable outcome.

I must extend significant commendation to our team leader. Their ability to maintain focus was exceptional. They expertly facilitated the discussion, ensuring all perspectives were considered by diligently drawing out every contribution, and then skillfully synthesized these disparate ideas into unified, mutually agreed-upon decisions. This precise combination of authoritative leadership and universal dedication amplified our collective efficacy, resulting in a final product that far surpassed what any individual effort could have achieved. It was a potent reaffirmation of the immense potential inherent in a cohesive team, guided by strong leadership.

## 5 Final words

"Lạc trên biển" proved to be an invaluable and highly engaging experience. I not only successfully enhanced my skills and strengthened key relationships but also significantly broadened my perspective. Moving forward, a re-engagement with this scenario would see me decisively prioritize securing the essential tools for a rapid rescue and maintaining an unwavering focus on an adequate water supply to proactively eliminate the risk of dehydration. This experience has definitively equipped me with critical insights for future challenges.
