

Introduction - Software

Answer below questions concisely with your understanding:

- a. Identify the difference between a programming language and a compiler. Give at least **one** illustrative example.
- b. Identify the difference between a code editor and an IDE. Give at least **one** illustrative example.
- c. Identify the different levels of programming language and give at least **3** examples *per level*.
- d. Which criteria characterize the above level separation of programming languages? For example, what are the properties that separate high-level ones from the middle-levels?

Your submission should be written in Microsoft Word in .docx format and be named with *<StudentID>.docx* where *<StudentID>* is your Student ID (for example 25123456.docx).
