

Slide Design with GenAI

Introduction to IT

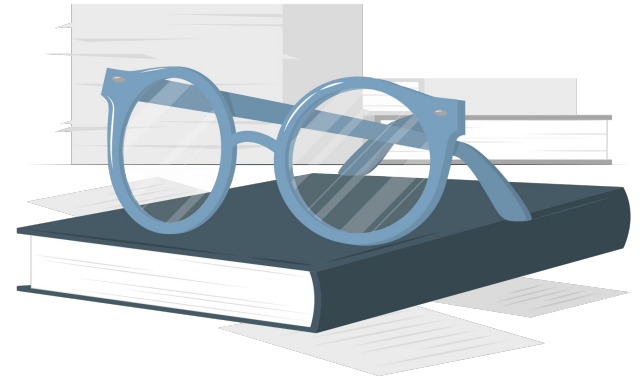

Abstract

Understand the impact of **Generative AI** on content creation and **explore some AI tools** for creating presentation slides.

Table of Contents

1. GenAI in Content Creation
2. Infographic Generation
3. Slide Generation

01

GenAI in Content Creation

What can GenAI do?

Difficulties	Advantages of GenAI
Don't know where to start writing	Generate outlines, structures, and ideas
Not good at design	Create illustrations and posters
Don't have a nice voice	Produce smooth and expressive voice
Don't know how to make videos	Generate scripts and quickly build videos with AI

GenAI doesn't do everything for you, but it helps you get started and work faster!

Applications of GenAI

Content	Tools
 Text	ChatGPT, Gemini, Claude
 Image	DALL·E, Bing Image Creator, Gemini, Canva
 Slide	Gamma, Kimi, AgnesAI
 Infographic	Napkin, Canva
 Video	HeyGen, Veo3, Pippit
 Voice	ElevenLabs, Vbee, FPT.AI

 **Do not require any coding or design → Explain everything in detail**

Advantages of using GenAI

 Advantages	 Attention
Quick – Diversity	Output requires a review process
Support for non-experts	Risk of limited personalization
Generate creative suggestions	Avoid plagiarism or 100% copying
Focus on ideas and save time	Learn prompting techniques to achieve accurate results

Do not require any coding or design → Explain everything in detail

02

Infographic Generation

Create infographic with Napkin

Step 1: Create infographic content by ChatGPT.

Prompt: “Bạn là nhà sáng tạo nội dung chuyên nghiệp. Hãy viết giúp tôi nội dung infographic cho chiến dịch “Sống Xanh Gen Z”. Trình bày ngắn gọn, hài hước, trẻ trung, tập trung vào các ý: Giảm rác nhựa, Tiết kiệm năng lượng, Đi lại xanh, Thời trang bền vững, Tiết kiệm chi phí.

SỐNG

XANH

GEN

Z

Tagline: “Nhẹ túi – nhẹ dấu chân – nặng tinh thần sống chất.”

5 điều làm ngay (và ngẫu ngay):

Giảm rác nhựa: Ly cá nhân vào – rác nhựa đi ra.

Tiết kiệm năng lượng: Rút sạc khi đủ pin, ví bớt “tiêu hao”.

Đi lại xanh: Đi bộ/đạp xe – lên mood, xuống CO₂.

Thời trang bền vững: Mặc lại–sửa lại–đổi lại, phong cách vẫn “slay”.

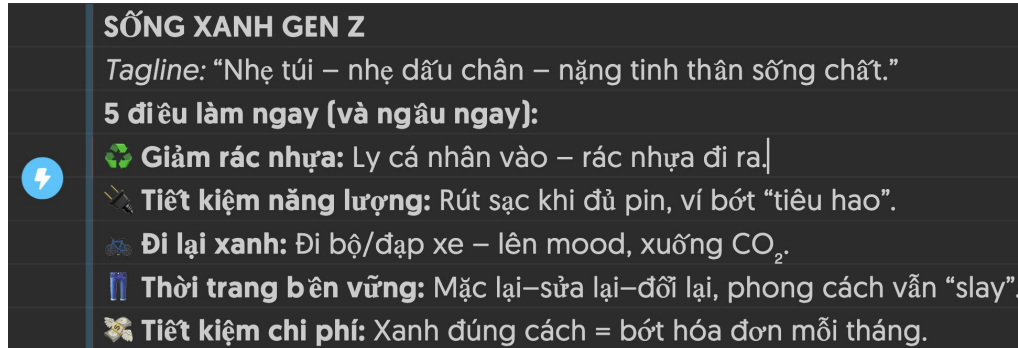

Tiết kiệm chi phí: Xanh đúng cách = bớt hóa đơn mỗi tháng.

Create infographic with Napkin

Step 2: Access www.napkin.ai

Step 3: At the main page, Create New Napkin.

Step 4: Paste infographic content, click Generate Visual.

Create infographic with Napkin

Step 5: Select a preferred template and adjust the content accordingly.

Step 6: Click Export, choose PNG and then Download it.

Made with Napkin

Slide Generation

AI Tools for Slide Generation

Tool	Pros	Cons
Canva AI 	Intuitive interface, many templates, easy to use.	Generated content lacks depth, focuses more on design than logical structure
Gamma.app 	Create slides quickly from prompts, clearly organized by outline	Simple design, limited customization of images or fonts
Kimi 	Generate multiple slides quickly from existing documents or prompts	
AgnesAI 	AI integration for automatic text writing and illustrative images	Limited layout customization, restricted editing

Advantages

Boost Speed by 5–10x:

- No need for advanced PowerPoint skills
- Turn ideas → slides in just a few minutes

Enhance Professionalism:

- Clear structure and modern design
- Fewer spelling mistakes and less repetition

Optimized for Non-Experts:

- Students, teachers, and startups can easily prepare pitches and presentations

Exercise!

Presentation

Exercise

- Design an **introductory presentation about yourself**. There are no restrictions on the content or the number of slides.
- You may use any presentation software (MS PowerPoint, Canva, etc.)
- You are allowed to use AI tools to support your design process.
- **Note**: Try to minimize the use of transition effects (trust me, the instructors don't usually like them 😊).
- **Submission rule**: Upload one single file named **StudentID.pdf** to Moodle.

THANK YOU
for your listening
