

Project 1

Developing a Startup Website

This project not only guides you through building a complete e-commerce website but also immerses you in a startup journey: from planning the brand and designing an engaging interface to developing teamwork and project management skills.

1 Introduction

In this project, students work collaboratively as a team of motivated and creative individuals to conceptualize and develop an innovative startup idea. Each group is given the opportunity to freely select the products or services they wish to offer. The project encourages teams to design a unique business concept that reflects their collective interests and entrepreneurial passion.

It is important to emphasize that this project **does not require website programming**. Therefore, you are encouraged to use existing platforms and tools such as:

- WordPress: <https://wordpress.com/>
- Wix: <https://www.wix.com/>
- Google Sites: <https://sites.google.com/>
- Shopify: <https://www.shopify.com/>
- Hugo (bonus score): <https://gohugo.io/>
- etc.

In addition, here are some suggested tools to support teamwork:

- Zoom: <https://zoom.us/>
- Slack: <https://slack.com/>
- Trello: <https://trello.com/>
- Discord <https://discord.com/>
- etc.

2 Required Deliverables

2.1 Website

Your website must satisfy the following requirements:

- A beautiful, creative, and customer-appropriate interface design.
- It should include essential e-commerce features such as shopping cart, payment options, and related functionalities.
- Rich and engaging content with attractive and well-written product descriptions.

2.2 Report

Prepare a detailed report that includes:

- **Project Planning and Task Distribution:** Document the team member responsibilities, which includes information on each task assigned to team members and the completion rate. E.g., Student A has percentage of completion 90% and the group work has total score of 9.0, then A receives a score of $9.0 * 90\% = 8.1$.

Therefore, it is important to evaluate the contribution of group members fairly.

- **Website Link:** Provide the public link to your completed website.
- **Website Designing:** Describe the structure, layout, and main features of the website. Include screenshots or figures where necessary to illustrate the interface and functionalities.
- Include any references in a properly formatted bibliography section.

2.3 Slide

- Make clear slides that show the main points of your project.
- Prioritize images and avoid too much text.

2.4 Presentation

- All members must participate in the presentation. You may use either English or Vietnamese.
- The presentation should be coherent, impressive, and fit within a 10-minute time limit.

3 Submission

Your report and slide must be submitted in a compressed ZIP file (.zip extension) named according to the format **TeamName.zip**. If the compressed file is larger than 20MB, you may upload it to Google Drive and provide a text file with the public shared link (absolutely no modifications are allowed after the deadline).

Here is a detail of the directory organization:

```
TeamName
├── Report.pdf
└── Slide.pdf
```

4 Assessment

No.	Details	Score
1	Website	5 points
2	Report	2 points
3	Slide	1 points
4	Presentation	2 points
	Total	10 points

5 Notices

Please pay attention to the following notices:

- This is a **GROUP** assignment. Each group has 4 - 5 members.
Groups with fewer or more members than the specified limit require lab instructor approval.
- Duration: approximately 3 weeks.
- AI tools are **not restricted**; however, students should use them wisely. Lab instructors have the right to conduct additional oral interviews with random groups to assess their knowledge of the project.
- **Any form of plagiarism, dishonesty, or misconduct will result in a grade of zero for the course.**

The end.
