2	25127128	Nguyễn Nhật Quang
3	25127181	Nguyễn Lê Gia Bảo
4	25127113	Võ Thiện Trí Nhân

Ho Chi Minh City - 30/11/2025

Acknowledgements

The successful completion of this project would not have been possible without the invaluable guidance, support, and inspiration from several key individuals and external sources. Our group, Hỉ Nộ Ái Ổ, extends its deepest gratitude to those who played an instrumental role in shaping our work.

To Our Supervising Lecturers We owe a profound debt of gratitude to our two supervising lecturers, Mr. Nguyễn Thanh Tinh and Mr. Lê Nhựt Nam. Their dedication and expert guidance were the pillars upon which this entire project was built.

Clarity of Direction: They provided us with a clear and logical roadmap, especially in the initial, often daunting, stages of the project. Their advice was instrumental in making the crucial decision regarding the appropriate design tools and technologies to implement.

Structured Execution: They consistently steered us towards the right methodology for website development and deployment, ensuring we maintained a high standard of quality and feasibility.

Professional Reporting: They meticulously guided us on the proper structure and content required for writing a professional and accurate report, transforming raw data into a cohesive document. Their mentorship went beyond mere instruction; they inspired us to overcome challenges and provided the wisdom to execute our vision correctly.

To Our Sources of Inspiration Our design philosophy and functional goals were significantly influenced by two exemplary e-commerce websites in the technology retail space. We extend our sincere thanks to the teams behind: [GearVN](#) and [Phong Vũ](#).

These two websites served as our primary source of inspiration and benchmarking. The clean aesthetics, intuitive user experience, and well-executed features of both Gearvn.com and Phongvu.vn motivated us to set a high standard for our own project's design and functionality. They demonstrated the pinnacle of a well-designed technology retail website, allowing us to successfully conceptualize and implement our own beautiful and functional features.

We hope that this final work reflects the high standards set by their inspiration and the rigorous guidance provided by our lecturers.

Abstract

This report documents the entire process and outcome of the website development project undertaken by Group Hỉ Nộ Ái Ổ for the Introduction to Information Technology subject. The project was executed through three distinct and successful phases over a period of two weeks in November 2025. These phases included General Planning & Concept Development, which defined the e-commerce concept and selected the appropriate platforms and tools; Production & Content Development, which completed the website design and integrated all content; and Finalization & Review, which ensured the website, report, and presentation slides were finalized to meet all required functions and standards.

The resulting e-commerce platform, named Sao Bá Cooling, specializes in PC cooling components. It is designed with a modern, clean, and easy-to-navigate structure, specifically optimized for a shopping-oriented User Interface (UI). Key features of the implementation include an intuitive navigation bar with four main pages (Shop All, Water Cooling, Air Cooling, About) and prominent homepage sections showcasing deals up to 50%. Essential service advantages such as Fast Delivery and 24/7 Operation are clearly highlighted.

The shopping experience is professionalized through a grid product display, a functional price filter slider, and the practice of displaying both original and discounted pricing to emphasize value. Furthermore, the brand identity is established on the "About" page with the mission, "Keep your rig cool," and a summary of key strengths, including a wide product ecosystem, technical consultation, and authentic goods. The project successfully delivered a complete and fully functional e-commerce website, reflecting the high standards set for both design and operational features.

2 Project Information

2.1 Overall Plan

2.1.1 General Planning & Concept Development

Start - End date: 10/11/2025 - 16/11/2025.

Goal:

- Define the concept for the e-commerce website.
- Select theme and overall visual direction.
- Decide which platforms and tools will be used.

Description:

- Team meeting to align ideas and finalize the project direction.
- Test different platforms/tools before making a final decision.

2.1.2 Production & Content Development

Start - End date: 17/11/2025 - 20/11/2025.

Goal:

- Complete the website design and integrate content into the site.
- Draft the slide structure, choose the slide theme, and decoration style.
- Design the website logo.

- Prepare and update the project report in parallel.

Description:

- Assign three members to research and develop content.
- The three members co-design the website layout and visuals.
- Group session to create the common slide deck.
- Leader gives feedback and monitors progress, writes logo prompts for AI generation, and continuously updates the report.

2.1.3 Finalization & Review

Start - End date: 21/11/2025 - 23/11/2025.

Goal:

- Finalize the website with all required functions.
- Finalize the slide deck.
- Finalize the written report.

Description:

- Tasks are assigned and followed up on during team meetings.
- In the final stage, the leader joins in to refine all deliverables and give comments.
- The team sits together to review and evaluate the project outcome.

2.2 Task distribution and completion assessment

2.2.1 General Planning & Concept Development

Start - End date: 10/11/2025 - 16/11/2025

Goal - Performers:

- Set overall plan - Huy, Bảo.
- Define the concept - Huy, Quang.
- Decide platforms and tools - Nhân, Bảo.
- Select theme and overall visual direction - Whole team.

Result evaluation: 100%.

2.2.2 Website & Slide Making

Start - End date: 17/11/2025 - 20/11/2025

Goal - Performers:

- Complete the website design - Bảo, Quang.
 - Description: Design the website layout and structure based on the selected theme.
- Integrate content into the site - Huy, Bảo, Quang.
 - Description: Insert written content and visuals into the website sections.
- Draft the slide - Bảo, Quang.
 - Description: Prepare the initial slide structure and arrange the main points.
- Design the website logo - Bảo.
 - Description: Create the website logo following the project's style guidelines.
- Update the project report - Huy.
 - Description: Revise and add new information to keep the report up to date.

Result evaluation: 100%.

2.2.3 Finalization

Start - End date: 21/11/2025 - 23/11/2025.

Goal - Performers:

- Finalize the website - Nhân.
 - Complete all functions and refine the website for final delivery.
- Finalize the presentation - Quang, Bảo.
 - Polish slide content, visuals, and transitions for the final version.
- Finalize the website report - Huy.
 - Complete the final report with full project details and evaluations.

Result evaluation: 100%.

Note: all members finish 100% of their task, so the result evaluation is 100%

3 Website Information

The website Sao Bá Cooling is designed as an e-commerce platform specializing in PC cooling components. Its structure is clean, modern, and easy to navigate with clear product segmentation and a strong focus on shopping-oriented UI.

Link to our website: [Sao Bá Cooling](#).

3.1 Layout & Visual Structure

The homepage begins with a large hero banner featuring the text “Special offer on each product” along with a central Shop Now button.

Right below, two promotional blocks highlight Air Cooling Sale (up to 50%) and Water Cooling Upgrade Deals, making product segmentation visible at first glance.

The site continues with service advantage icons: Fast Delivery, Free Shipping, Discounted Price, and 24/7 Operation.

A Shop by Category section follows, separating products into Water Coolers and Air Coolers using circular thumbnails for quick recognition.

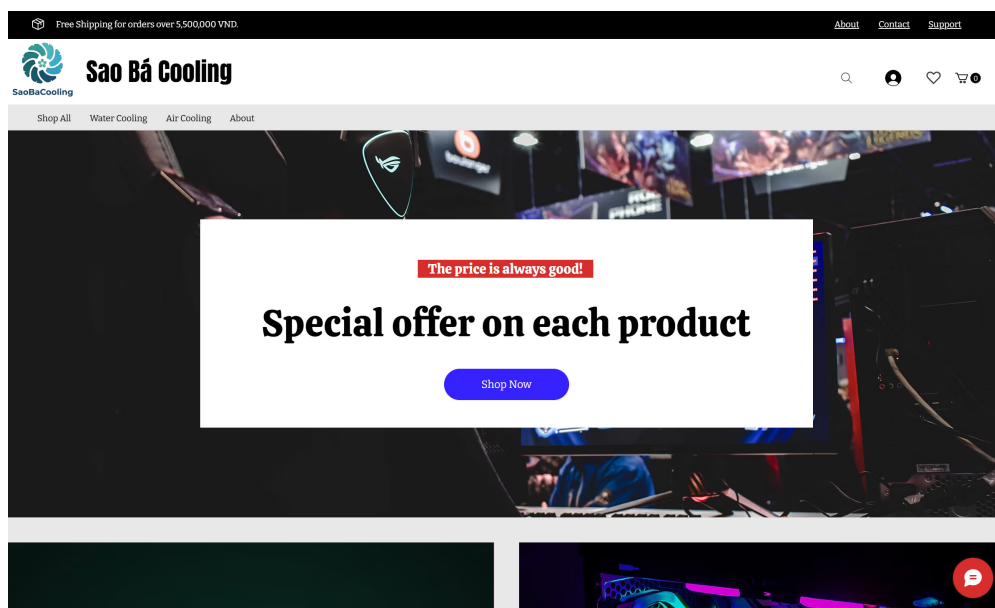

Figure 1: *Home Page*

3.2 Navigation Structure

The top navigation bar includes four main pages:

- Shop All
- Water Cooling
- Air Cooling
- About

Standard e-commerce utilities are present on the right: search, user account, wishlist, and shopping cart.

This layout makes navigation simple and familiar for anyone experienced with online shopping.

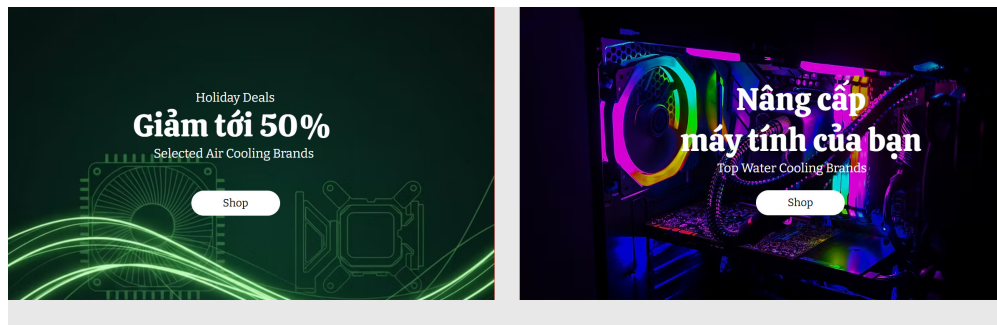

Figure 2: *Product Deals*

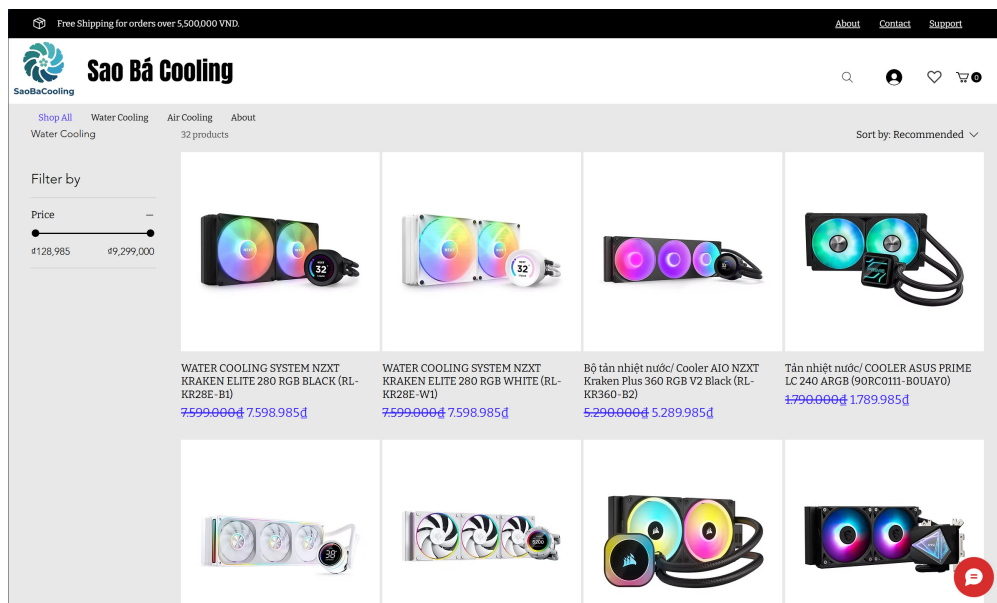

Figure 3: *Shop All Page*

3.3 Product Display & Shopping Functionality

The product page uses a grid layout displaying images, names, and pricing clearly.

A price filter slider allows users to narrow down products by cost.

Each item shows both the original and discounted price, emphasizing sales and purchase motivation.

Sorting options are also available to improve browsing convenience.

3.4 About Page Content

The About section explains the brand values, passion for PC cooling, and mission “*Keep your rig cool.*”.

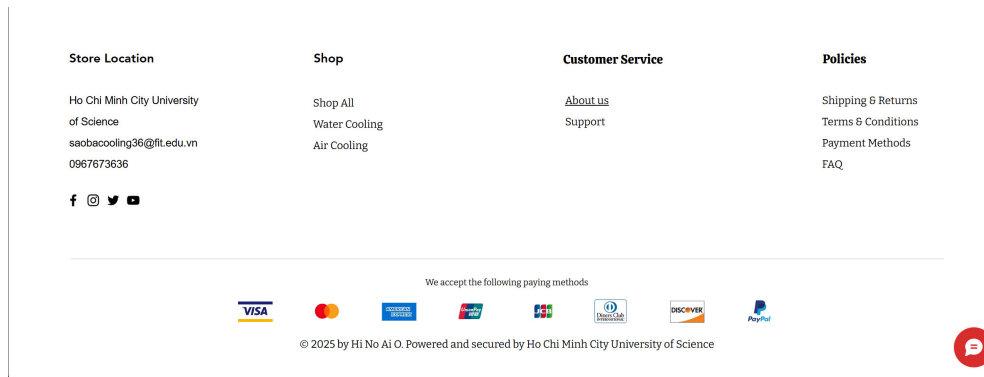

Figure 4: *Footer*

Strengths mentioned:

- Wide product ecosystem
- Technical consultation and compatibility support
- Authentic and quality-controlled goods

The page also includes a recruitment form, showing openness to expansion and community involvement.

3.5 Footer & Customer Support Information

Location: Ho Chi Minh City University of Science.

Contact details: Email + Phone number.

Available social links: [Facebook](#), [Instagram](#), [X](#) (formerly Twitter), [YouTube](#).

Policy tabs: [Shipping & Returns](#), [Terms & Conditions](#), [Payment Methods](#) and [FAQ](#).

Accepted payment methods such as [Visa](#), [Mastercard](#), [JCB](#) and [PayPal](#) are also displayed for credibility.
